Organised by
National Metallurgical Laboratory
Jamshedpur - 831007, India

About the Conference

The INCOME series of conferences, initiated by International Mechanochemistry Association (an associate member of IUPAC) in the year 1993 has served as an important platform for fostering the growth of the discipline of mechanochemistry by bringing together different stakeholders from academia, research institutions and industries. The last three editions of INCOME were held in Prague (Czech Republic) in 2000, Braunschweig (Germany) in 2003 and Novosibirsk (Russia) in 2006. The sixth conference in the series, INCOME 2008 is being held in India at National Metallurgical Laboratory, Jamshedpur, one of the leading R&D laboratories under the Council of Scientific & Industrial Research (CSIR), New Delhi (India). The scientific programme will comprise invited lectures, oral presentations and poster display. Participation from students and research scholars is especially encouraged.

Scope

The conference will cover all facets of mechanochemistry with emphasis on

- ▣ **Synthesis and processing in solid state- science and technology:** Mechanochemistry, Mechanical alloying, Mechanical activation, Severe plastic deformation of materials (SPD), Reaction milling, Thermodynamics and modelling, Kinetics of solid state processes
- ▣ **Structural characterisation:** Mechanically induced changes in activated solids, surfaces and interfaces in activated solids
- ▣ **Properties:** Chemical, Electrochemical, Electrical, Magnetic, Electronic, Optical, Tribological, Thermal, Mechanical
- ▣ **New material/processes:** Nanoparticles, Nanocomposites, Quasi-crystalline phase materials, Molecular design, Coatings, Self propagating high temperature synthesis
- ▣ **Applications:** Mechanical alloying, Metal extraction, Ceramics, Catalysis, Cements, Geopolymers, Pharmaceuticals, Agriculture, Ecologically safe technologies
- ▣ **New equipment & procedures:** Milling equipment, Preparation, Characterisation and handling of active powders

Special Sessions

A number of thematic sessions have been planned. These include:

- ▣ Advances in mechanical alloying
- ▣ Nanoparticles and nanocomposites through milling
- ▣ Advanced ceramics for energy, electronics, structural and other applications
- ▣ Severe plastic deformation and friction-stirred welding
- ▣ Large size mechanical activation devices and environment friendly metal extraction processes
- ▣ Mechanochemistry of macromolecules for drug application
- ▣ Cements and novel building materials through mechanical activation
- ▣ CO₂ reduction/sequestration and waste utilisation from metallurgical and allied industries

Technical Programme

There has been an overwhelming response to the call for papers at this conference. About 200 abstracts covering various aspects of mechanochemistry from synthesis to applications have already been received. More than 40 experts have consented to deliver invited talk during the conference.
